

SuperTech Index Futures

Nano TEC | Micro LTEC

The SuperTech Index tracks 15 of the largest, most liquid, and prominent US tech stocks, and represents companies engaged in high-growth tech, media, and manufacturing industries. SuperTech tracks Facebook, Amazon, Apple, Netflix, and Google and goes beyond FANG names to include companies such as Tesla, PayPal, and Zoom to truly reflect the broader tech sector. SuperTech Futures offer investors exposure to the key companies shaping the future of technology innovation.

Offered in two contract sizes (Nano and Micro), our smaller-sized contracts are designed to make futures trading more accessible to individual traders.

All product and company names are trademarks™ or registered® trademarks of their respective holders. Use of them does not imply any affiliation with or endorsement of or by LMX Labs LLC or FairX.

SuperTech and SuperTech Max is a trademark of LMX Labs, LLC (“LMX”)

LMX Labs, LLC is registered with the U.S. Commodity Futures Trading Commission (“CFTC”) as a designated contract market (“DCM”) and operates under the name Fair Exchange or FairX (the “Exchange”).

Commodity futures contracts are not suitable for all investors. The risk of loss in trading commodity futures contracts can be substantial. You should, therefore, carefully consider whether such trading is suitable for you in light of your circumstances and financial resources. You may sustain a total loss of the funds that you deposit with your broker to establish or maintain a position in the commodity futures market, and you may incur losses beyond these amounts. If the market moves against your position, you may be called upon by your broker to deposit a substantial amount of additional margin funds, on short notice, in order to maintain your position. If you do not provide the required funds within the time required by your broker, your position may be liquidated at a loss, and you will be liable for any resulting deficit in your account. Therefore, investors should only use funds that they can afford to lose without affecting their lifestyles and only a portion of those funds should be devoted to any one trade because investors cannot expect to profit on every trade as it does not take into account their objectives, financial situation or needs.
